

WHAT DO I DO IF I MAY HAVE BEEN INJURED IN THE ACCIDENT?

If you suspect that you may possibly have been injured, **seek medical attention as soon as possible**. Usually after a crash your body will go into shock and releases endorphins which mask the pain of an injury. You may notice that your fingers are shaking a little and your heart rate is elevated due to this fight or flight reaction.

It is common for people who have surgical injuries only feeling stiffness, a burning sensation, or a headache the day of the crash. Let the doctor know about any symptoms or that you may be in shock. He or she will know what to do.

In addition, the longer you delay in treatment the more likely it becomes that the insurance company and their attorneys will argue that it was not the accident or collision that caused your injury.

It is imperative that you find an Arkansas attorney who knows how to handle an automobile accident claim and has the professionalism to meet with you one on one in order to work up your case properly. If you have been in an automobile collision, a consultation with our attorneys is free. You will owe us nothing unless we are able to successfully resolve your case.

Don't delay! We can help you today! Free Consultation! (501) 843-7576

We make home visits and hospital visits in certain cases! The faster we can get started on your case, the better your chances!

Also, there is no charge for an initial consultation! You owe us nothing unless we recover compensation for you!

Please contact us online or call us at (501)843-7576 or toll free at (888)459-3077.
